What is WolfJobs?

Wolfjobs is a **Dockerized MERN web application** that matches on-campus jobs to students, allowing managers and students to connect easily and efficiently.

Managers can post jobs, screen applicants, review and accept applicants.

Students can apply to jobs, take questionnaires, and receive notifications on acceptance

Why Pick WolfJobs?

- Allows students to get updates and notifications on job status
- MERN technology stack is an industry standard and worth learning
- Provides a consistent and clean UI with specific branding colors and conventions
- Allows employers to prescreen applicants with questionnaires

Frontend Coverage

62%

Backend Coverage

47%

M1. Integrate Google Calendar

By integrating Google Calendar it will help remind students of upcoming interviews so that they can always be up to date.

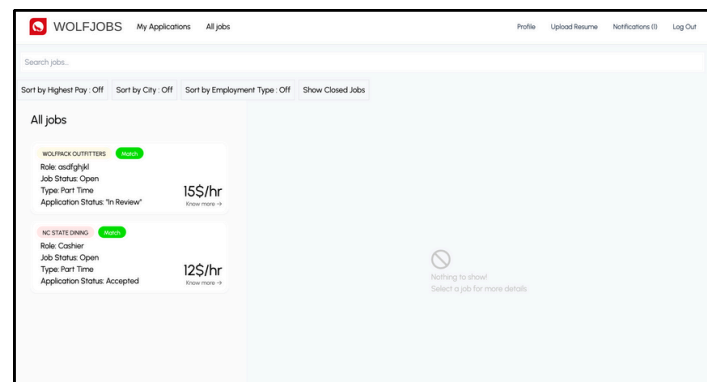

M2. Update Email Notification

To additionally help remind students of job updates and interviews, email notifications will be added.

M3. Integrate Shibboleth

Since the target audience of this project is NC State employees and NC State students, integrating the standardized login functionality will increase security and benefit the standard flow of users.
